AWA BEST USE OF WINDOWS & DOORS RESIDENTIAL NEW CONSTRUCTION UNDER \$1 MILLION

DLG Aluminium & Glazing

Black Springs House
Beechworth, Victoria

Set on a rural allotment on the fringes of a historic gold mining township, the owners wanted a light, spacious and modern home. At the same time, the new building needed to be a sensitive addition to the nearby historic structures dating back to the 1800s.

The result is a highly detailed and energy efficient home that is able to withstand temperature ranges from below zero in winter to above forty degrees Celsius in summer.

JUDGES' COMMENTS

The sleek lines of these windows and doors perfectly complement the overall design of this house. It is a wonderful example of how to showcase openness and capture views while maximising comfort in the harsh environmental climate of the Albury-Wodonga region.

System AWS Magnum Series 616 Awning/Fixed
